

# Clue into Measurement

## Materials

For each group of four students:  
Set of *Clue into Measurement* cards  
1 Mathematics Chart

## Number of Players

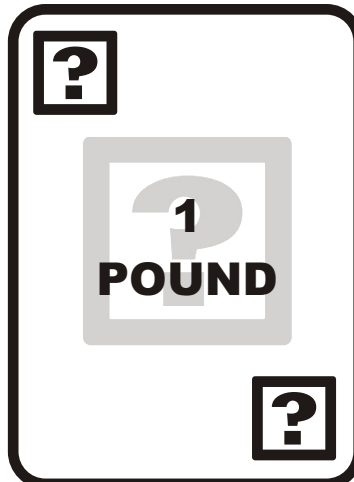

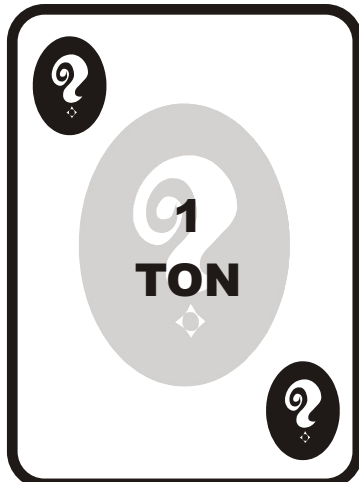

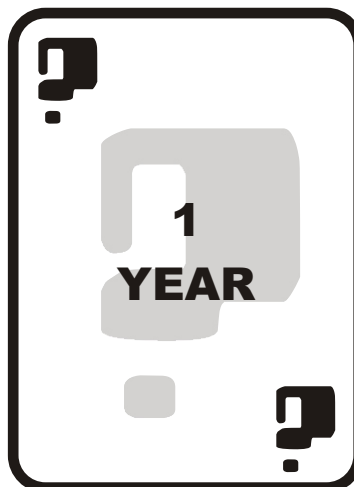

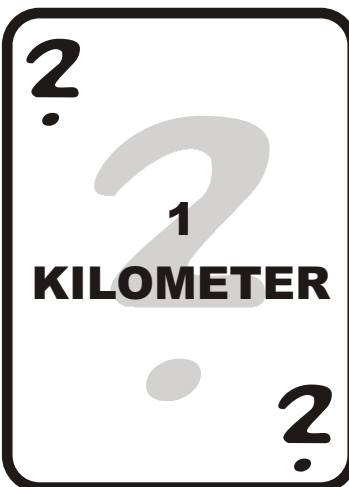

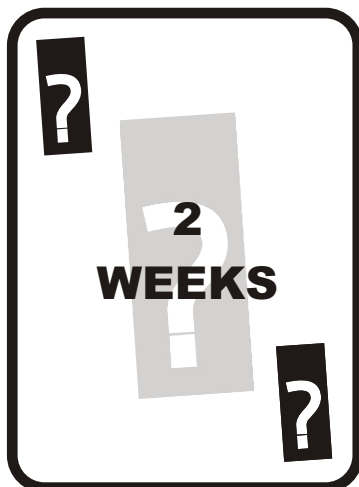

4

## Directions

1. Divide the students into teams of two. Pair up teams to compete against each other.
2. The *Clue into Measurement* cards should be shuffled and placed face down between the competing teams.
3. The player with the darkest color hair begins first.
4. Player 1 will begin the game as the Clue Giver and his or her partner will be the Clue Receiver for Team 1.
5. The Clue Givers may use the Mathematics Chart when giving clues.
6. The Clue Giver on Team 1 will draw a card and show the Clue Giver on Team 2. No other player should see the card.
7. The Clue Giver from Team 1 will then give his or her teammate a clue for the measurement on their card. Clues cannot contain any words used in the answer.
8. The Clue Receiver from Team 1 gives an answer to the clue.
9. If the answer is correct, then Team 1 receives a point.
10. If the answer is incorrect, then the Clue Giver on Team 2 may give his or her teammate a clue. If his or her teammate guesses the answer, then Team 2 gets a point.
11. If the answer is not guessed by either team, then the card is turned over to reveal the answer.
12. The Clue Giver on Team 2 draws a card and repeats the process.
13. After two rounds, the Clue Giver should switch roles with the Clue Receiver. Play continues until all of the cards are drawn.
14. The team with the most points wins.
